

Climate Change Policy Statement

Coca-Cola Hellenic strives to limit its impacts on climate change and to carry out all its business activities in a sustainable manner. We believe that industry has a key role to play in finding sustainable solutions to today's climate challenges.

The direct greenhouse gas emissions from Coca-Cola Hellenic operations result mostly from the use of energy in bottling plants and fleet. Indirect emissions stem from raw materials (ingredients and packaging) and cooling equipment.

In accordance with our Environmental Policy, we will:

- **Reduce** the energy used in our operations.
- **Implement** alternative or renewable energy technologies that provide additional sustainable energy to our facilities. An example of this is our programme to construct combined heat and power plants alongside bottling plants.
- **Engage** with stakeholders to combat climate change, e.g. by working with suppliers to reduce the carbon embedded in packaging materials, and the carbon footprint of our cooling equipment.
- **Report** our greenhouse gas emissions, targets, results and activities openly and in accordance with the Greenhouse Gas Protocol.

As Chief Executive Officer I am committed to this Climate Change Policy Statement which is owned and endorsed by the Corporate Social Responsibility Committee of the Board of Directors. Responsibility for the successful implementation of this programme belongs with every Coca-Cola Hellenic employee at each level and function in the organisation.

Dimitris Lois
Chief Executive Officer
